

Genting Malaysia Berhad and AGIBOT Forge Strategic Collaboration to Advance Embodied AI Robotics Across Leisure & Hospitality and Entertainment

Genting Highlands, Malaysia, 17 April 2026 – Genting Malaysia Berhad (GENM), a Malaysian-based multinational company and a leading player in the leisure and hospitality industry, has entered into a Memorandum of Understanding (MoU) with AGIBOT Innovation (Shanghai) Technology Co. Ltd (AGIBOT), marking a significant step towards advancing embodied artificial intelligence (AI) robotics across the hospitality, entertainment and leisure industries.

The MoU was formalised today during the AGIBOT Partners Conference (APC2026) in Shanghai, China, bringing together global leaders to explore the future of robotics and AI-driven ecosystems. Representing GENM at the signing was Aaron Chia Khong Chid, Chief Operating Officer of Resorts World Genting, witnessed by Tan Sri Lim Kok Thay, Deputy Chairman and Chief Executive of GENM; Dato' Indera Lim Keong Hui, Deputy Chief Executive and Executive Director of GENM; and Lee Thiam Kit, President of GENM, while AGIBOT was represented by Steven Ding, Malaysia Director of AGIBOT, witnessed by Abel Deng, President of Asia-Pacific Middle East Region; Daniel Jiang, AGIBOT Partner and Co-President; and Deng Taihua, AGIBOT Founder and Chief Executive Officer.

The collaboration between GENM and AGIBOT aims to establish a joint framework to explore, develop and commercialise innovative robotics solutions tailored to real-world applications. By combining AGIBOT's strengths in embodied robotics with GENM's expertise in integrated resort operations, the collaboration is set to accelerate the adoption of intelligent automation while enhancing operational efficiency and guest experiences.

Under the MoU, both parties will focus on developing robotics solutions across three key areas: theme parks, leisure & hospitality and entertainment. This includes the development of humanoid robots for guest interaction, concierge and service functions, as well as robotics integration in live shows and immersive attractions. The collaboration will also encompass joint research and development initiatives, pilot projects and the creation of scalable application ecosystems.

To support initial deployment efforts, GENM will be acquiring and deploying embodied robots from AGIBOT to support pilot programmes and operational integration across its properties.

At the conference, AGIBOT also announced the launch of Malaysia's first Robotics Gala Performance, set to debut at Resorts World Genting. The upcoming showcase, scheduled for early 2027, will feature cutting-edge AI robots in a live performance setting, offering audiences a first-of-its-kind immersive entertainment experience in the country.

“Innovation has always been central to Genting Malaysia’s approach in shaping the future of hospitality and entertainment. As guest expectations continue to evolve, we are constantly exploring new ways to deliver more immersive, seamless and memorable experiences,” said Aaron Chia Khong Chid, Chief Operating Officer of Resorts World Genting. “This collaboration with AGIBOT allows us to take a meaningful step into the world of embodied robotics, where technology can enhance both service and storytelling within our integrated resort environment. We believe this initiative will open new opportunities to redefine how guests interact with our spaces while strengthening our position as a forward leader in the tourism industry.”

“This collaboration represents a major milestone as AGIBOT deploys embodied AI robotics solutions into real-world, large-scale integrated resort environments,” said Abel Deng, President of the Middle East and Asia Pacific Region at AGIBOT. “By combining AGIBOT’s cutting-edge humanoid robotics with GENM’s operational excellence and creative vision, we aim to redefine guest engagement and service standards across theme parks, hotels, and live entertainment. The upcoming Robotics Gala Performance at Resorts World Genting marks just the beginning — together, we are building a scalable ecosystem in which humanoid robots enhance human experiences in meaningful and compelling ways.”

With this initiative, GENM reinforces its position at the forefront of innovation in the regional hospitality and entertainment landscape, further elevating Malaysia’s tourism industry through enhanced and experience-driven integrated resort offerings. At the same time, AGIBOT expands its global footprint in delivering next-generation embodied AI robotics solutions.

About Genting Malaysia

Genting Malaysia is one of the leading leisure and hospitality corporations in the world. Listed on Bursa Malaysia with approximately RM10 billion in market capitalisation, Genting Malaysia owns and operates major resort properties including Resorts World Genting (RWG) in Malaysia; Resorts World New York City, Resorts World Catskills and Resorts World Hudson Valley in the United States of America (US); Resorts World Bimini in the Bahamas; Resorts World Birmingham and over 30 casinos in the United Kingdom (UK); and Crockfords Cairo in Egypt. Genting Malaysia also owns and operates two seaside resorts in Malaysia, namely Resorts World Kijal in Terengganu and Resorts World Langkawi on Langkawi Island.

Located 6,000ft above sea level, RWG is Malaysia’s premier hilltop integrated resort. The resort features wide-ranging leisure and entertainment facilities including 10,500 rooms across seven distinct hotels, gaming, theme park and amusement attractions, dining and retail outlets, as well as international shows and business convention facilities. Nestled amidst the mid-hills, Resorts World Awana complements this extensive premium experience with its natural greenery, mountainous golf course, trekking trails, and proximity to key attractions. Moreover, Genting Highlands Premium Outlets (a joint venture between Genting Plantations Berhad and Simon Property Group), further complements RWG’s diverse offerings,

solidifying its status as a leading leisure and entertainment hub in the region.

Genting Malaysia is a member of the Genting Group, one of Asia's leading and best-managed multinational companies. The Genting Group is led by Tan Sri Lim Kok Thay, a visionary entrepreneur who has successfully established the Resorts World brand as a leader in the leisure and hospitality sector in Malaysia, Singapore, the US, the Bahamas and the UK. Tan Sri Lim Kok Thay also has significant investments in other industries globally including oil palm plantations, property development, power generation, oil and gas, cruise and biotechnology.

About AGIBOT

AGIBOT is dedicated to driving innovation through the integration of AI and robotics, creating world-leading general-purpose embodied robot products and an application ecosystem. Built on the foundation of the robotic body and powered by the fusion of interaction, manipulation, and locomotion intelligence - "1 Robotic Body, 3 Intelligence" - AGIBOT is a leading robotics company in the industry to deliver a complete product portfolio and deploy across all major application scenarios. In March 2026, AGIBOT announced the rollout of its 10,000th robot, marking a major milestone in large-scale production and deployment.
