Welcome Message

To all of our invited guests, exhibitors, speakers, and visitors, on behalf of Resorts World Genting, I would like to extend my heartfelt thanks and a warm welcome to you for joining the inaugural Genting Sustainbiz Food & Beverage Expo.

This expo proudly marks Resorts World Genting's debut into the sustainability space and we are grateful for all the support that we've received from our partners and the new connections we've made as a result of this endeavour.

Our core belief is to be part of the solution, not the pollution and we've gathered people who carry the same agenda for this expo.

With more than 50 exhibitors and partners, the Genting Sustainbiz Food & Beverage Expo brings together the best solutions in the market in one place and allows for brands to easily network and exchange ideas.

From cultivated meats to cups made from coffee grounds, there's plenty to see and learn this 10 – 12 September at Genting International Convention Centre (GICC).

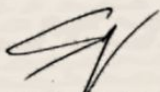

As they say, seeing is believing and our exhibitors have prepared an array of tasty products for visitors to try for themselves at our live cooking demonstrations scheduled throughout the event.

We will also take the stage to showcase the made-in-Genting products like Flavours of Genting's sambals and pre made curry pastes that are sure to surprise and delight many.

For an intimate look into running sustainable businesses, we've invited multiple prominent speakers to share their insights and we are conducting panel discussions for leaders to share their ideas too.

As a B2B event, we've also prepared networking events including a VIP area for discussions and an exclusive by-invitation only networking dinner.

Together, let us make an impact in the industry and be part of the solution for future generations of F&B providers.

Spencer Lee
EVP, Sales, Marketing, and Public Relations
Resorts World Genting

FOOD SERVICE

Your Local Culinary Expert

We've pioneered a technology to create coffee biocomposites from 'coffee grounds' typically discarded

after brewing. By transforming them into versatile products for diverse applications, we're actively reducing coffee waste and plastic usage. Our initiative aligns with the goals of the Sustainable Development Goals (SDGs), aiming to promote responsible consumption and production practices while fostering business sustainability.

How we do it

Coffee products

At our company, we're making a difference by repurposing coffee grounds to create eco-friendly products. By turning coffee grounds into pellets, we're not only reducing waste but also preventing pollution that would occur if the grounds were thrown into landfills.

Benefit

Our eco-friendly products, crafted from repurposed coffee grounds transformed into pellets, offer a multitude of benefits. Not only are they environmentally conscious, but they're also dishwasher-friendly, BPA-free, and meet Food Safety Grade standards. What's more, our innovative process saves at least 35% of plastic throughout production, further enhancing sustainability.

Contained over 51% coffee grounds

Save 35% plastic on production

DO WELL BY DOING GOOD

Since 2014, we have adopted regenerative agriculture techniques at our farms, focusing on two main objectives:

- Minimising the production of non-recyclable organic waste
- Maximising the utilisation of locally available natural resources

Farm Fresh operates seven dairy farms and four processing facilities across Malaysia and Australia. Our farms consist of 13,810 dairy cows & bulls, spanning across a total of 5,367 acres of land. Farm Fresh is the first dairy company in Asia to be awarded the internationally recognized Certified Humane® certification, aligned with our commitment to animal welfare and sustainability.

146.73

million kg of solid waste recycled and removed from water discharge.

1,486,520

kg of chemical fertiliser removed from our cycle.

MILK ON TAP

HAS PREVENTED THE USE OF **375,000** PLASTIC BOTTLES ELIMINATING OVER **18,700 KG** OF PLASTIC PACKAGING

"We do not need everybody to make a massive change. We just need a lot of people to make small changes."

Loi Tuan Ee,

Group CEO and Group Managing Director of Farm Fresh Berhad

Solving Food Waste Sustainably With Insects

INTRODUCTION

Entomal is a trailblazing force in sustainable waste management. As the first in Southeast Asia, we harness cutting-edge technology to breed and rear **black soldier flies (BSF)**, revolutionising waste transformation.

- Our flagship project, the **Entomal Mobile Bioconversion System (EMBC)**, spearheads efficient waste treatment at the source. By ingeniously converting food waste into insect protein and organic fertiliser, EMBC sets a precedent for responsible urban practices.
- Complementing this, our **Central Biowaste Conversion Plant** amplifies our impact, providing a centralised hub for waste-to-resource conversion.

Through these endeavours, Entomal pioneers a greener, circular future for waste management & national food security.

THE PROBLEM

Global issues in solving carbon emission.

95% of CO₂ producers of food waste ends up in landfills
2.5t of CO₂ produced from each ton of household waste
10% of CO₂ produced from food collection infrastructure
<20% of CO₂ produced from food waste produced in Malaysia daily
3rd largest CO₂ emitter in the world
170000t of CO₂ produced from food waste produced in Malaysia daily

THE SOLUTION

Offset 98% of carbon emission from landfill with black soldier fly bioconversion.

EMBC (ENTOMAL MOBILE BIO-CONVERSION SYSTEM)

Size: 20'x8ft
Capacity: 1000 kg/month
Service: subscription
One unit in one year: 1.3 tons waste diverted, 30 tons CO₂ offset, 1.3 tons animal feed, 2.4 tons fertiliser, 1000 kg insect protein, 1000 kg animal feed, 3000 kg fertiliser.

SMART INDOOR GARDEN

Designed for busy urban adults with limited space and no green thumb.

Hassle-Free
Simply top up water and nutrients weekly

Smart & Efficient
Automated watering, lighting and temperature

Salad Fridays
Promote a culture of health among employees

Employee Engagement
Through green-themed activities

Elevate Your Space
With edible landscape and improve air quality

Grow up to **60 plants/3kg** of fresh greens each harvest

Vegetables

Herbs

Flowers

Fruits

Embracing Sustainability

Fresh, local pesticide-free greens

Zero waste, harvest only what you need

Eco-friendly, save 90% water, no nutrient runoff

Custom LED light, low voltage, high yield, and energy efficient

We Help You Adopt Precision Agriculture, So You Can Make More Profit.

The Problem

For oil palm plantations, millions of plants mean its impossible to manage every single trees. With market solutions that are getting more fragmented and complex, its hard for plantations to know what they need to solve their solution. Here are some problems that plantation companies face:

⊗ MANUAL TREECOUNT CAPTURE CANNOT SCALE AND NOT ACCURATE

⊗ LEADS TO PLANTATION BUDGETING VS ACTUAL NOT ACCURATE

⊗ NO USER-FRIENDLY SOLUTION TO MANAGE PLANTATION ASSETS CONTINUOUSLY

The Solution

MASS DATA COLLECTION USING DRONES

- Raw Data captured at scale
- Experienced drone operations team with more than 10,000 flight hours.

→ A.I. PROCESS USING DEEPSKY™ →

DeepSky™
AI Technology

- Automated Treecount
- Automated Unhealthy Plant
- Vacant Point
- Bagworm Pest
- Stand-per-ha

CLOUD DASHBOARD USING GAIA™

→ DATA-DRIVEN REPORTING

Gaia™

Dashboard Platform

- Monitor actual plant condition via customised dashboard analytics
- Analyse total trees and other digitized data by custom areas
- Update field data via mobile app
- Create custom reports based on required template i.e. board paper
- Make decision based on the most updated data

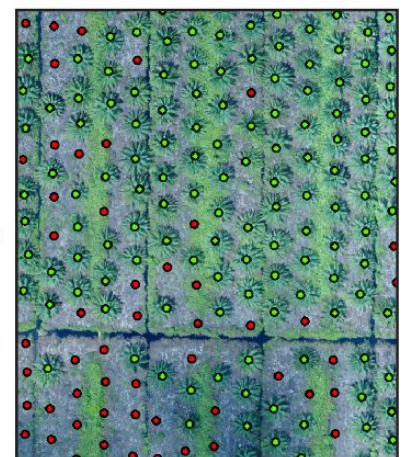

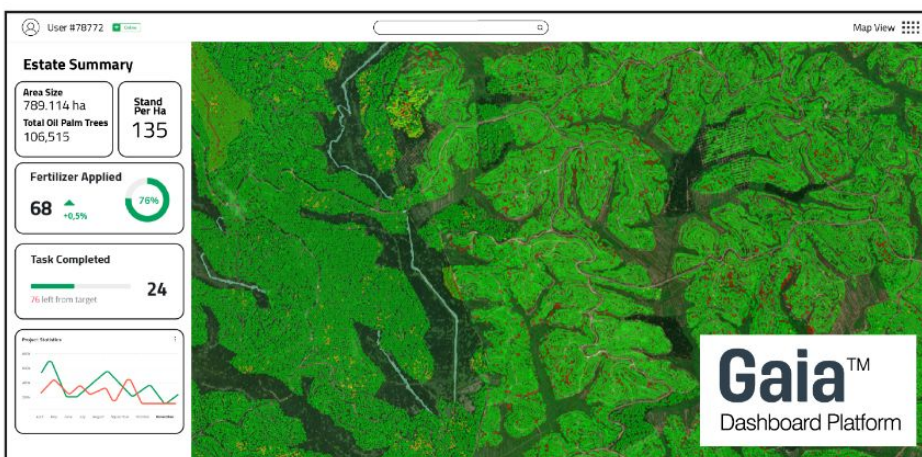

DATA CAPTURE

A.I. PROCESS

PRECISE MONITORING

REPORT

Gaia provides the 'command centre' dashboard which are fully customisable so you can monitor the right metrics, integrate any data from third party platforms, and collaborate across departments. Gaia is the canvas for your plantation analytics and automation.

The Outcome

95%

of clients reported improved accuracy in forecasting fertilizer orders

20%

estimated increase in fertilizer savings and yield combined.

90%

of clients reported increase in operations efficiency due to visibility of tree health

Farmer's By Fefifo

Fefifo

Fefifo is a venture-backed Agri-tech company pioneering Co-Farming in Malaysia. Fefifo's mission is to use innovative technology, data and business models to help small farmers grow better, sell higher, and to bring safe and healthy food to businesses and families.

We Build & Operate Co-farms with Technology & Off-take for Land Owners

To start their own commercial farms in ready-to-farm spaces, smart precision systems and training for the local community with ready off-take market.

We Supply Fresh Crops to HoReCa & Kitchen Operators

From our structured, Digitalised Contract Farming programs with >1.4m planting points under management, >170 local small farmers spanning >400-acre, growing >40 different crops, across 9 states.

We Supply Sambal Paste as Bulk Kitchen Supplies & in Consumer Packaged Jars

That is vertically integrated across the food value chain to achieve quality produce from our Fefifo Farmer Network, that goes to creating quality food products.

Now available online & other retailers in KL

Fefifo is a winner of World Summit Awards 2023 (WSA), a prestigious international forum co-funded by the European Union with two decades of experience showcasing cutting-edge digital innovations with positive impact.

Fefifo is an Impact Enterprise that has been granted Social Enterprise status by the Ministry of Entrepreneur Development of Malaysia, in recognition for our work's alignment with and effort in helping to achieve UN SDGs #2, #8, #5, #12.

Problem Statement

1 in 2 people in the world suffer from sensitive skin

Traditional laundry detergents contain synthetic ingredients and chemicals:

- Skin irritation & allergies**
No. 1 cause of sensitive skin and skin allergies
- Water pollution**
Detergent is the No.1 pollutant of water system

Product Solution

ecoMINIM® - eco-friendly detergent that uses plant-based and food grade ingredients and **NO HARMFUL** chemicals:

- NO SLES**
A known CARCINOGEN, skin irritant and number 1 water pollutant
- NO CDE/BETAINE**
Cause of skin irritation and allergenic potential and sensitization
- NO FORMALDEHYDE**
CARCINOGEN, Hazardous to aquatic life and negatively impact ecosystems
- NO PARABEN**
A known chemical that can cause breast cancer and skin sensitivity

Customer Testimonial

"My eczema is called dyshydrotic eczema which means I have to avoid water. But my hands recovered after 1 week of using ecoMinim® Concentrated Dishwash. By the way, it cleans well even oily dishes. Pricing is reasonable."

Angelina
Tech Specialist

"I could not believe it when after I used it for the first time, my hands improved so much. I went back to my old dishwash and the sensitivity came back. So, I only use ecoMinim Concentrated Dishwash. Now my mother who has sensitive hands use it as well. When we started using we felt like it wasn't clean but actually it is."

Reviving *traditional* Nyonya flavours with a *modern, healthy twist*

BETTER INGREDIENT FOR A HEALTHIER MEAL

Peru's Unrefined Cane Sugar

Preserves the rich molasses flavour and essential nutrients lost in conventional sugars. Minimally processed to maintain its natural properties, it offers a wholesome sweetness to our cuisine.

Australia's Lake Salt Light

Sourced from mineral-rich lake beds, it contains 50% less sodium than regular salt. It's enhanced with vital minerals like potassium and magnesium, promoting better heart health and a balanced diet without sacrificing flavour.

Penang Soup Pastes

Our diverse range includes Asam Laksa, Penang Har Mee, Curry Mee, and Green Tom Yam. Just add water, boil and it's ready to be served.

Ready-To-Eat Meals

Just heat up and serve! Choose from a variety of local Nyonya flavours. Ranging from Asam Fish, Rendang, Sambal Petai, and much more without the use of any gluten mock meats.

Chilli Pastes

Dip, fry or cook! Spice up your meals naturally with our chilli paste series, prepared with the healthiest ingredients for a guilt-free heat.

Noodles Kit

Experience the revolution of instant noodles with our healthier, Plant-based Noodle Box. Bringing the authentic taste of Malaysia right to your home.

Frozen Traditional Snacks

Discover our multiple flavours of Hericium Mushroom, a healthy, quick snack for the discerning gourmet. Suitable for deep frying or air frying. Just heat and done!

Cooking Pastes

Simplify your cooking with our ready-to-use recipe bases, adding depth and tradition to any dish. Add on your favourite ingredient into it!

CELLULAR AGRICULTURE

- Plant-based scaffolding for enhancing cultivated meat texture.
- Scale-up expansion of cells
- Ingredient formulation via spent media analysis to support cell growth.

CULINARY TECHNOLOGY

- Enhancement of organoleptic properties of future foods.
- Nutrition profiling of future foods.
- Precision fermentation ingredients and insect-based proteins in food applications.

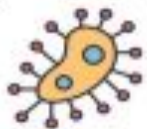

EDUCATION & OUTREACH

- Curriculum development with industry partners on cellular agriculture, precision fermentation, ethics, and regulation.
- Fostering a nationwide community to shape the future of foods through collaborations.

Alternative Proteins

Future Foods Domain

School of Applied Science
Temasek Polytechnic

A collaboration between Temasek Polytechnic and APAC- Society for Cellular Agriculture: APAC Society for Cellular Agriculture (Student Chapter).

APAC-SCA (Student Chapter) is Singapore's inaugural student organization focused on uniting students throughout the Asia Pacific region who are committed to advancing the future of food through cellular agriculture. Initially launched in Singapore, the society aims to promote awareness and cultivate a preference for cultivated food products among the upcoming generations of consumers. Scan the QR code to discover more about our activities and initiatives!

Strategic Partnerships

Vegan and Sustainability Food consultant

Global Warming

Meat and dairy products have the highest global footprint of carbon, accounts for around 14.5% of global greenhouse gas emissions

Water usage

It takes more than 2,400 gallons of water to produce just 1 pound of meat. Only 25 gallons of water are required to grow 1 pound of wheat.

Food losses and food waste

Around 1/3 of the food produced is lost along the food chain. Some causes for this include human carelessness, neglect, process inadequacies, and improper packaging.

Sustainability Workshops

Join my acclaimed "Sustainability on the Plate" workshops, designed for organizations looking to integrate sustainability into their daily operations. Learn how to translate sustainability values into everyday food choices, making it easier than ever to make eco-friendly decisions that benefit both your business and the planet.

Raising Awareness

I aim to foster understanding and inspire action towards adopting habits that promote long-term ecological balance and social responsibility

I work closely with chefs, restaurant owners, and managers to highlight the vital connection between menu choices and sustainability. Understand the impacts of your culinary decisions on carbon footprint emissions, water usage, and food wastage. With this knowledge, they can take actionable steps toward creating a greener kitchen.

Creating Sustainable Menus

I assist chefs in developing sustainable and decarbonized menus that not only satisfy customers' palates and boost profits but also support environmental stewardship.

By offering innovative, delicious, and eco-friendly dishes, I show restaurants, hotels, cafes how they can be a leader in sustainable dining.
